Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as the disclosure is enabling only for claims limited in accordance with the disclosure at the bridging paragraph of pages 3-4 of the specification. See MPEP 706.03(n) and 706.03(z).

This paragraph states that acylation of the N-methyl compound (the compound of Example 1 and claim 2) will produce a compound wherein R^2 is an acyl group while R_3 - R_5 can be other radicals. The specification is not enabling with respect to the compound wherein only R_2 is hydrogen. The last paragraph of page 2 of the specification only teaches the preparation of the compound wherein R_2 - R_5 are all hydrogen.

In claim 1 the word "New" should be deleted because it is redundant and the word "compounds" should be singular.

The following is a new rejection which was inadvertently omitted

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103 as being unpatentable over Kobrehel et al, of record. The instantly claimed N-methyl compound is an obvious *methyl* analog of the reference compound. See In re ~~Paquette~~, 165 USPQ 317, 319.
